

AY25 PROGRAM ASSESSMENT REPORT

v2026.1

Tracking Data

CIM code (e.g., ME-CM)	
Program Name	MS Program (Professional Master, no thesis option)
Assessment Year	2024-2025
Program Assessment Coordinator	Lin Cai
Year of Current Assessment Plan	2024
No Assessment This Year per Plan	☐
LO(s) Assessed	LO1-3
Presented at program authority meeting date: <i>Please attach minutes</i>	Documents were shared with the committee via email for review and comment.

Methodology

For each LO and artifact assessed, please describe methodology used, and attach (as supplemental files during report submission) or insert here the rubric used. At minimum this should contain:

- a description of how the artifact is concordant with the LO
- a rubric describing the method used to place individual student in at least 3 assessment categories; {**D** Does not meet expectations, **M** Meets expectations **M**, **P** Proficient}

LO1: Upon completion of this program, students will be able to demonstrate knowledge in fundamental mathematical and engineering analysis of electrical and computer engineering and how these are applied to the utilization and development of current technology.

LO2: Upon completion of this program, students will be able to understand state-of-the art technology and research in a core subject area of their major program.

LO3: Upon completion of this program, students will learn technical skills needed by public and private sector employers.

We used the ECE Dept. NCA rubric forms to evaluate student artifacts. The evaluation rubric form is closely aligned with the LO by providing a structured framework for assessing student performance. Each criterion within the rubric directly corresponds to specific LOs. The faculty members in the ECE Department are involved in the evaluation and they submitted the rubric forms to the ECE Dept. The ECE Dept. NCA Chair has collected the data and generated the average statistics for each LO.

The following evidence sources are attached: UPAC Assess report DMP data MAS.xlsx.

Results

Artifact samples

Attach artifact samples. You can paste them in here if feasible, attach them to the end of this report, or submit them as supplemental files when submitting your reports. For data sets with ≤ 10 students, provide 1 in each category, D,M,P, (unless the category is empty, if so state that). For programs with ≤ 20 , provide 2. For other programs provide 3. Please redact any personally identifiable information, PII (which includes names and A#s). Please convert your documents to PDFs.

Please use the following naming convention for your artifact files: **AY25_CIM-CODE_Name of Artifact.pdf**.

Data table

For each LO and provide a table pasted in from the downloadable [provided template](#), placing each student into the assessment categories (minimally {D, M, P}). You should collect and analyze data linked to student A#s locally, but please redact any personally identifiable information, PII (including names or A#s) in tables presented in this report. Provide a summary graph from the template presenting this distribution. You should also present additional analysis as deemed appropriate by the results seen, and the needs of the program.

student	major	D/M/P
student 1	MAS	M
student 2	MAS	M
student 3	MAS	M
student 4	MAS	D
student 5	MAS	M
student 6	MAS	P
student 7	MAS	P

student	major	D/M/P
student 1	MAS	M
student 2	MAS	M
student 3	MAS	M

student 4	MAS	M
student 5	MAS	M
student 6	MAS	P
student 7	MAS	P

student	major	D/M/P
student 1	MAS	M
student 2	MAS	M
student 3	MAS	M
student 4	MAS	M
student 5	MAS	P
student 6	MAS	P
student 7	MAS	P

Description of findings

Summarize the discussion that occurred within the program authority when this was presented. Provide a short narrative interpreting the findings. Are there any areas of concern?

There has been a decrease in enrollment in the master's programs. Based on the available data,

evaluations from academic advisors indicate that all four student learning goals of the MAS program in ECE continue to be successfully met.

Continuous Improvement, CI, plans

The purpose of assessment is to improve the quality of our educational programs. The most important part of the assessment cycle is how we use the data to improve our programs. Examine the data provided above describing student achievement, consider the root cause of any deficits, and if areas for possible improvement emerge, describe plans to achieve this improvement.

Prior CI plan impact

Also, please refer to the previous assessment report for the LOs assessed. Were any CI plans recommended? Were they implemented? Did the plans work (were improvements seen in this cycle)?

☐ no previous CI plans available

We have continued to improve the quality and the quantity of the ECE Dept. Seminar and Distinguished Lecture Series (ECE693) and invite MAS students to attend the seminars. This helped MAS students to achieve the learning goal #2.

This cycle's CI plan

Describe any CI plans developed from this cycle's data, with

- Specific curricular or instructional changes in response to this assessment data,
- A timeline for implementation,
- As well a description of who will participate in and manage these plans

☐ After consideration and presentation to the program authority, no CI plans are recommended.

We will continue to review the current MAS programs to identify areas for improvement. This process will involve considering the deletion of outdated programs that no longer align with industry standards or student needs, followed by updating course content, streamlining program requirements, and implementing significant revisions where necessary.

To improve master's program assessment, we also plan to expand beyond the current Non-Course Assessments (NCA) by incorporating coursework evaluations for two master programs, i.e., Master of EE and CPE. This will involve mapping core courses of programs to the program learning outcomes (LOs), ensuring that each LO is evaluated through appropriate coursework. By combining course-based and non-course-based methods, we aim to gain a more complete understanding of student learning and better inform program improvements.
