Course Assessment Report

Learning Outcomes assessed in ITMM 574 for Academic Year 2024-2025

LO #1	Demonstrate foundational knowledge and application of information management technology frameworks concepts as they apply the management of IS in a large organizational environment.
LO #2	Describe and identify policy frameworks, legal and compliance implications, and best practices in information technology management frameworks, including those in IT Service Management and Information Security.

Methodology

LO#1 – The artifact chosen is final exam. It is concordant with Learning Objective #1 because the Exam requires students to demonstrate understanding the foundational knowledge and application of the information technology management framework concepts. Students are required to answer 80 questions covering 34 different foundational processes and functions used in the Information Technology Management as fully functional IT Management Framework.

The following rubric was used to place students in 3 assessment categories (D Does not meet expectations, M Meets expectations M, P Proficient):

	Does not meet expectations (Needs improvement)	Meets the expectation	Competent	Proficient
Final Exam Score	Score less than 65%	Score between 65% and 79.99%	Score between 80% and 89.99%	Score more than 89.99%

LO#2 – The artifact chosen is the Individual Practice Paper. It is concordant with Learning Objective #2 because the focus is application and implementation of everything students have learned within assigned process and function of IT Management Framework during the semester. Students apply their knowledge of technical concepts in the different layers of an Individual Practice Paper.

The following rubric was used to place students in 5 assessment categories (D Does not meet expectations, M Meets expectations M, P Proficient):

Results

Artifact samples

Attach artifact samples. For data sets with ≤ 10 students, provide 1 in each category (unless the category is empty, if so state that). For programs with ≤ 20 , provide 2. For other programs provide 3. Please redact any personally identifiable information, PII (which included names and A#s).

Data table

For each LO and provide a table pasted in from the [provided template](#) placing each student into the assessment categories (minimally {D, M, P}). Please redact any personally identifiable information, PII (including names or A#s) from this report. Provide a summary graph from the template presenting this distribution. You should also present additional analysis as deemed appropriate by the results seen, and the needs of the program.

Please see attached template spreadsheets. PII has been redacted as requested.

Description of findings

Summarize the discussion that occurred within the program authority when this was presented. Provide a short narrative interpreting the findings. Are there any areas of concern?

No areas of concern from instructor perspective. Students increase in proficiency throughout the semester, because the material is cumulative in nature and the project designed to give students a practice for applying the concepts. It is to be expected that proficiency on the Final Project is higher than an earlier assignments.
