

PROGRAM ASSESSMENT REPORT

v2024.1

Tracking data

CIM code	CIP Code 42.2799 - Research and Experimental Psychology, Other.
Program name	BS Behavioral Health & Wellbeing BS-BEHW-1 : (CIP Code 42.2799 - Research and Experimental Psychology, Other.)
year	Fall 2025
Program assessment coordinator	Arlen Moller
Assessment plan year	2024-2025
No assessment this year per plan	X
LO(s) assessed	L1 Students will appropriately apply basic research methods in psychology, including research design, data analysis, and interpretation. L2 Students will be able to describe key concepts, principles, and applications of psychology L3 Students will demonstrate effective communication to scientific and professional audiences
Presented at program authority meeting date: <i>Please attach minutes</i>	Discussed at the Dept of Psych Undergraduate Programs Meeting on Friday October 10 th , 2025. Minutes attached.

Methodology

For each LO and artifact assessed, please describe methodology used, and attach (as supplemental files during report submission) or insert here the rubric used. At minimum this should contain:

- a description of how the artifact is concordant with the LO
- a rubric describing the method used to place individual student in at least 3 assessment categories; {**D** Does not meet expectations, **M** Meets expectations *M*, **P** Proficient}

Presently, there are only 6 students enrolled in the BS in Behavioral Health and Wellness Program. When we looked for the target artifacts for LOs 1, 2, and 3, we discovered that few or no BEHW majors had taken those courses and produced those artifacts in the last academic year.

Learning Objective	Artifact	# of BEHW Majors producing this artifact in 2024-2025
1	PSY204 final paper, SP25	1
2	PSY312 final paper, FA24	0
3	PSY312 final paper, FA24	0

The enrollment in this program has been persistently low, despite concerted efforts to increase enrollment. The number of majors for the last 3 academic years are as follows.

Academic year	# of BEHW Majors
2022-2023	7
2023-2024	4
2024-2025	6

As such, we had insufficient data to assess this degree program. Further, because of persistently low enrollment, the Dept of Psychology is currently debating whether to sunset this program. As such, our assessment plan is to delay analysis of artifacts until Fall 2026. If the program has not been sunset at this time, we will submit a program evaluation that aggregates data from artifacts collected during the following five consecutive academic years (2023-2024; 2024-2025; 2025-2026; 2026-2027, 2027-2028).

Note, the reason that we had more data to analyze in the 2022-2023 academic year's BEHW program assessment report (and prior years) is that we reported data from all students who produced selected artifacts from specific courses, i.e., we did not filter the data to only report on BEHW Majors, specifically.

Continuous Improvement, CI, plans

Developing a continuous improvement (CI) plan and implementation strategy is on hold pending more data and an investigation into sunsetting the BEHW degree program.

Prior CI plan impact

Also, please refer to the previous assessment report for the LOs assessed. Were any CI plans recommended? Were they implemented? Did the plans work (were improvements seen in this cycle)?

X no previous CI plans available

This cycle's CI plan

Describe any CI plans developed from this cycle's data, as well as the strategy developed to implement these plans.

X After consideration and presentation to the program authority, no CI plans are recommended.
