

PARKER MORII-SCIOLLA - PORTFOLIO

S25 - COA OPEN HOUSE

Final Install - Change In Plot (In collaboration with Mercy Godfrey, Milton Molina, Nicole Dushi, Tindra Fundin, Lena Zayed, Kaustubh Mhatre, Jim Christie, Cylas Hall, Kara Connolly)

AIA Chicago 2025 Design Excellence - Interior Architecture Small

The IIT College of Architecture's 2025 Open House's theme, Change In Plot, reflects a year of bold ideas and transformative design.

Our installation represents the physical effects of our personal experiences on our designs. Starting with a grid, we pulled, pushed, and twisted our shapes to create new spaces to experience. This new space allows

visitors to walk, sit, lean, and climb.

Throughout this project, I experienced every aspect of the design-build process. I was named one of three managers for the project. I worked on the schedule, budget, frame design, assembly, dyeing, and wrapping of the structures.

Midterm Proposal - Today Tomorrow

TODAY TOMORROW

The future of architecture is often talked about but is still vaguely out of reach. This exhibit would visually reflect how our thoughts are comprehensible but not fully realized.

REPRESENTATION - HOW

Lanterns are used in many cultures as a way to celebrate, light, honor, and even cast wishes out.

A mix of color and shapes will allow people to immediately understand the difference between each subject.

The heights of these "lanterns" will allow people to understand how feasible or how "out of reach" these goals are.

The physical distance and ability for people to reach up in an attempt to touch the lanterns reflects how these goals can be achieved by putting in the work and "reaching" for them.

WHY FUTURE?

The CoA is currently teaching the future architects (as well as some stragglers) who will be one day taking over the industry

What the future of the industry believes is important to understanding how architecture will continue to evolve

REPRESENTATION - WHO

THE COA

Analyze what the future of the industry want to focus on when they are practicing

Understand the priorities that will be focused on in the next decade

The architecture industry

Analyze what the current industry are planning for

Understand what the current priorities of the industry

We ask everyone – students, staff, faculty, and anyone in the industry – the same question:

What is an issue in architecture/society that you want to be part of the solution for?

ORGANIZATION - HOW

Sort the responses into the various categories:

Social

Technological

Urbanism

Sustainability

ORGANIZATION - HOW

SHAPE

PATTERNS

Vo Trong Nghia

Frank Ghery

Shigeru Ban

Le Corbusier

TIMEFRAME

	Curating Response	Graphics	Other	Fabrication
Week 1			Finalize concept	
Week 2			Finalize concept	
Week 3	Break	Break	Break	Break
Week 4	5+ people gather responses	3+ Prep graphics for main display	Order frame materials	
Week 5	3+ organize responses	3+ Graphics for labels	1+ write up open house intro + order graphics materials	2+ Build frames in shop
Week 6		3+ Integrate written portions into graphics	Order paper materials	4+ Cut out labels (depends on material) + 3D print cushion frame
Week 7		3+ finalize graphics		3+ Laser cut lanterns + frames
Week 8			Print posters	3+ Laser cut lanterns + frames
Week 9				4+ Fold lanterns + patterns
Week 10			5+ Set up final system and lanterns	3+ Assembling the lanterns

TIME CALCULATION - LANTERN

1 lantern takes 15mins to laser cut

16 rows * 13 lanterns = 208 lanterns

208 lanterns * 15 mins = 3,120 mins = 52 hours

52 hours / 8 hours lab time = 6.5 days of cutting

TIME CALCULATION - LANTERN ASSEMBLY

1 lantern takes 5mins to assemble (max)

16 rows * 13 lanterns = 208 lanterns

208 lanterns * 5 mins = 1,040 mins = 17.3 hours

17.3 hours / 8 hours assembly time = 2.2 days of assembly

Note: This is if only one person is doing the work!!!
