Hi Diane.

There are currently 4 students in the HPB degree program.

Two of those students didn't take a studio and two took other design studios that did not have an emphasis on building science or sustainability.

This assessment is the first under the new program director, whjo is assessing the role of the design studio in the curriculum.

I believe the inclusion of the syllabi is to illustrate that the studio offerings, without a HPB focus as a choice, do not support the High Performance Buildings program. Youngjin Hwang (Program Director) is included here so that he can clarify if I have misrepresented the artifacts.

Thank you.

Subject: Regarding Docs Submitted for Program Assessment Reports

Hi Kindon:

I have not gone through all 4 of the reports you submitted this afternoon, but I was wondering if 2 of the documents you attached were for the report or if they were for the 400/500 syllabi request.

Let me know when you get a chance.

Thanks!

Diane Ffiles
