

AY25 PROGRAM ASSESSMENT REPORT

v2026.1

Tracking Data

CIM code (e.g., ME-CM)	MAS-ITM-2		
Program Name	Master of Information Technology Management		
Assessment Year	2024-2025		
Program Assessment Coordinator	Marwan Omar		
Year of Current Assessment Plan	2025		
No Assessment This Year per Plan	☐		
LO(s) Assessed	LO #1	Demonstrate foundational knowledge and application of information technology frameworks concepts as they apply the management of organizational environment.	
	LO #2	Describe and identify policy frameworks, legal and compliance implications, best practices in information technology management framework in IT Service Management and Information Security.	
Presented at program authority meeting date: <i>Please attach minutes</i>			

Methodology

LO#1 – The artifact chosen is final exam. It is concordant with Learning Objective #1 because the Exam requires students to demonstrate understanding the foundational knowledge and application of the information technology management framework concepts. Students are required to answer 80 questions covering 34 different foundational processes and functions used in the Information Technology Management as fully functional IT Management Framework.

The following rubric was used to place students in 3 assessment categories (D Does not meet expectations, M Meets expectations M, P Proficient):

	Does not meet expectations (Needs improvement)	Meets the expectation	Competent	Proficient
Final Exam Score	Score less than 65%	Score between 65% and 79.99%	Score between 80% and 89.99%	Score more than 89.99%

LO#2 – The artifact chosen is the Individual Practice Paper. It is concordant with Learning Objective #2 because the focus is application and implementation of everything students have learned within assigned process and function of IT Management Framework during the semester. Students apply their knowledge of technical concepts in the different layers of an Individual Practice Paper.

The following rubric was used to place students in 5 assessment categories (D Does not meet expectations, M Meets expectations M, P Proficient):

Results

Artifact samples

Attach artifact samples. For data sets with ≤ 10 students, provide 1 in each category (unless the category is empty, if so state that). For programs with ≤ 20 , provide 2. For other programs provide 3. Please redact any personally identifiable information, PII (which included names and A#s).

Data table

For each LO and provide a table pasted in from the [provided template](#) placing each student into the assessment categories (minimally {D, M, P}). Please redact any personally identifiable information, PII (including names or A#s) from this report. Provide a summary graph from the template presenting this distribution. You should also present additional analysis as deemed appropriate by the results seen, and the needs of the program.

Please see attached template spreadsheets. PII has been redacted as requested.

Description of findings

Summarize the discussion that occurred within the program authority when this was presented. Provide a short narrative interpreting the findings. Are there any areas of concern?

No areas of concern from instructor perspective. Students increase in proficiency throughout the semester, because the material is cumulative in nature and the project designed to give students a practice for applying the concepts. It is to be expected that proficiency on the Final Project is higher than an earlier assignments

This Cycle's CI Plan

Based on the assessment data, the program faculty recommend the following continuous improvement actions:

1. **Enhance Integration of Framework Concepts Across Modules:**
Although students demonstrated proficiency on the final exam and practice papers, faculty noted that students often compartmentalized knowledge by topic. Beginning in **AY26**, additional integrative case studies will be introduced mid-semester to require students to connect multiple IT management framework processes in a single analysis.
2. **Strengthen Applied Writing Skills in Practice Papers:**
While most students met or exceeded expectations, feedback from faculty indicated variability in the clarity and depth of students' policy, compliance, and best practice analyses. To address this, grading rubrics will emphasize synthesis and professional writing standards. Workshops on APA style and professional report preparation will be provided in Weeks 3 and 6.
3. **Expand Use of Industry-Based Scenarios:**
To better align with industry practices and accreditation expectations, future assignments will embed more **real-world compliance scenarios** (e.g., HIPAA, FedRAMP, GDPR). Graduate students will be required to propose mitigation strategies and compare multiple frameworks.

Timeline for Implementation:

- **AY26:** Pilot new case studies and enhanced rubric in ITM framework courses.
- **AY27:** Review results of implementation and collect new assessment data for analysis.

Responsible Parties:

- Program Coordinator (Dr. Marwan Omar) will oversee implementation.
- Faculty teaching ITM framework courses will develop and grade new case studies.
- The Program Assessment Committee will review outcomes annually and recommend further refinements.
